 -  Comprehensive Order Metadata
 -  Intoxication & Age-Check Policies
 -  Dry Zones & Legal Hours Enforcement
 -  Smart Recommendations
 -  Intoxication & Age-Check Policies
 -  Secure Data Management

What is Booze Buddies?

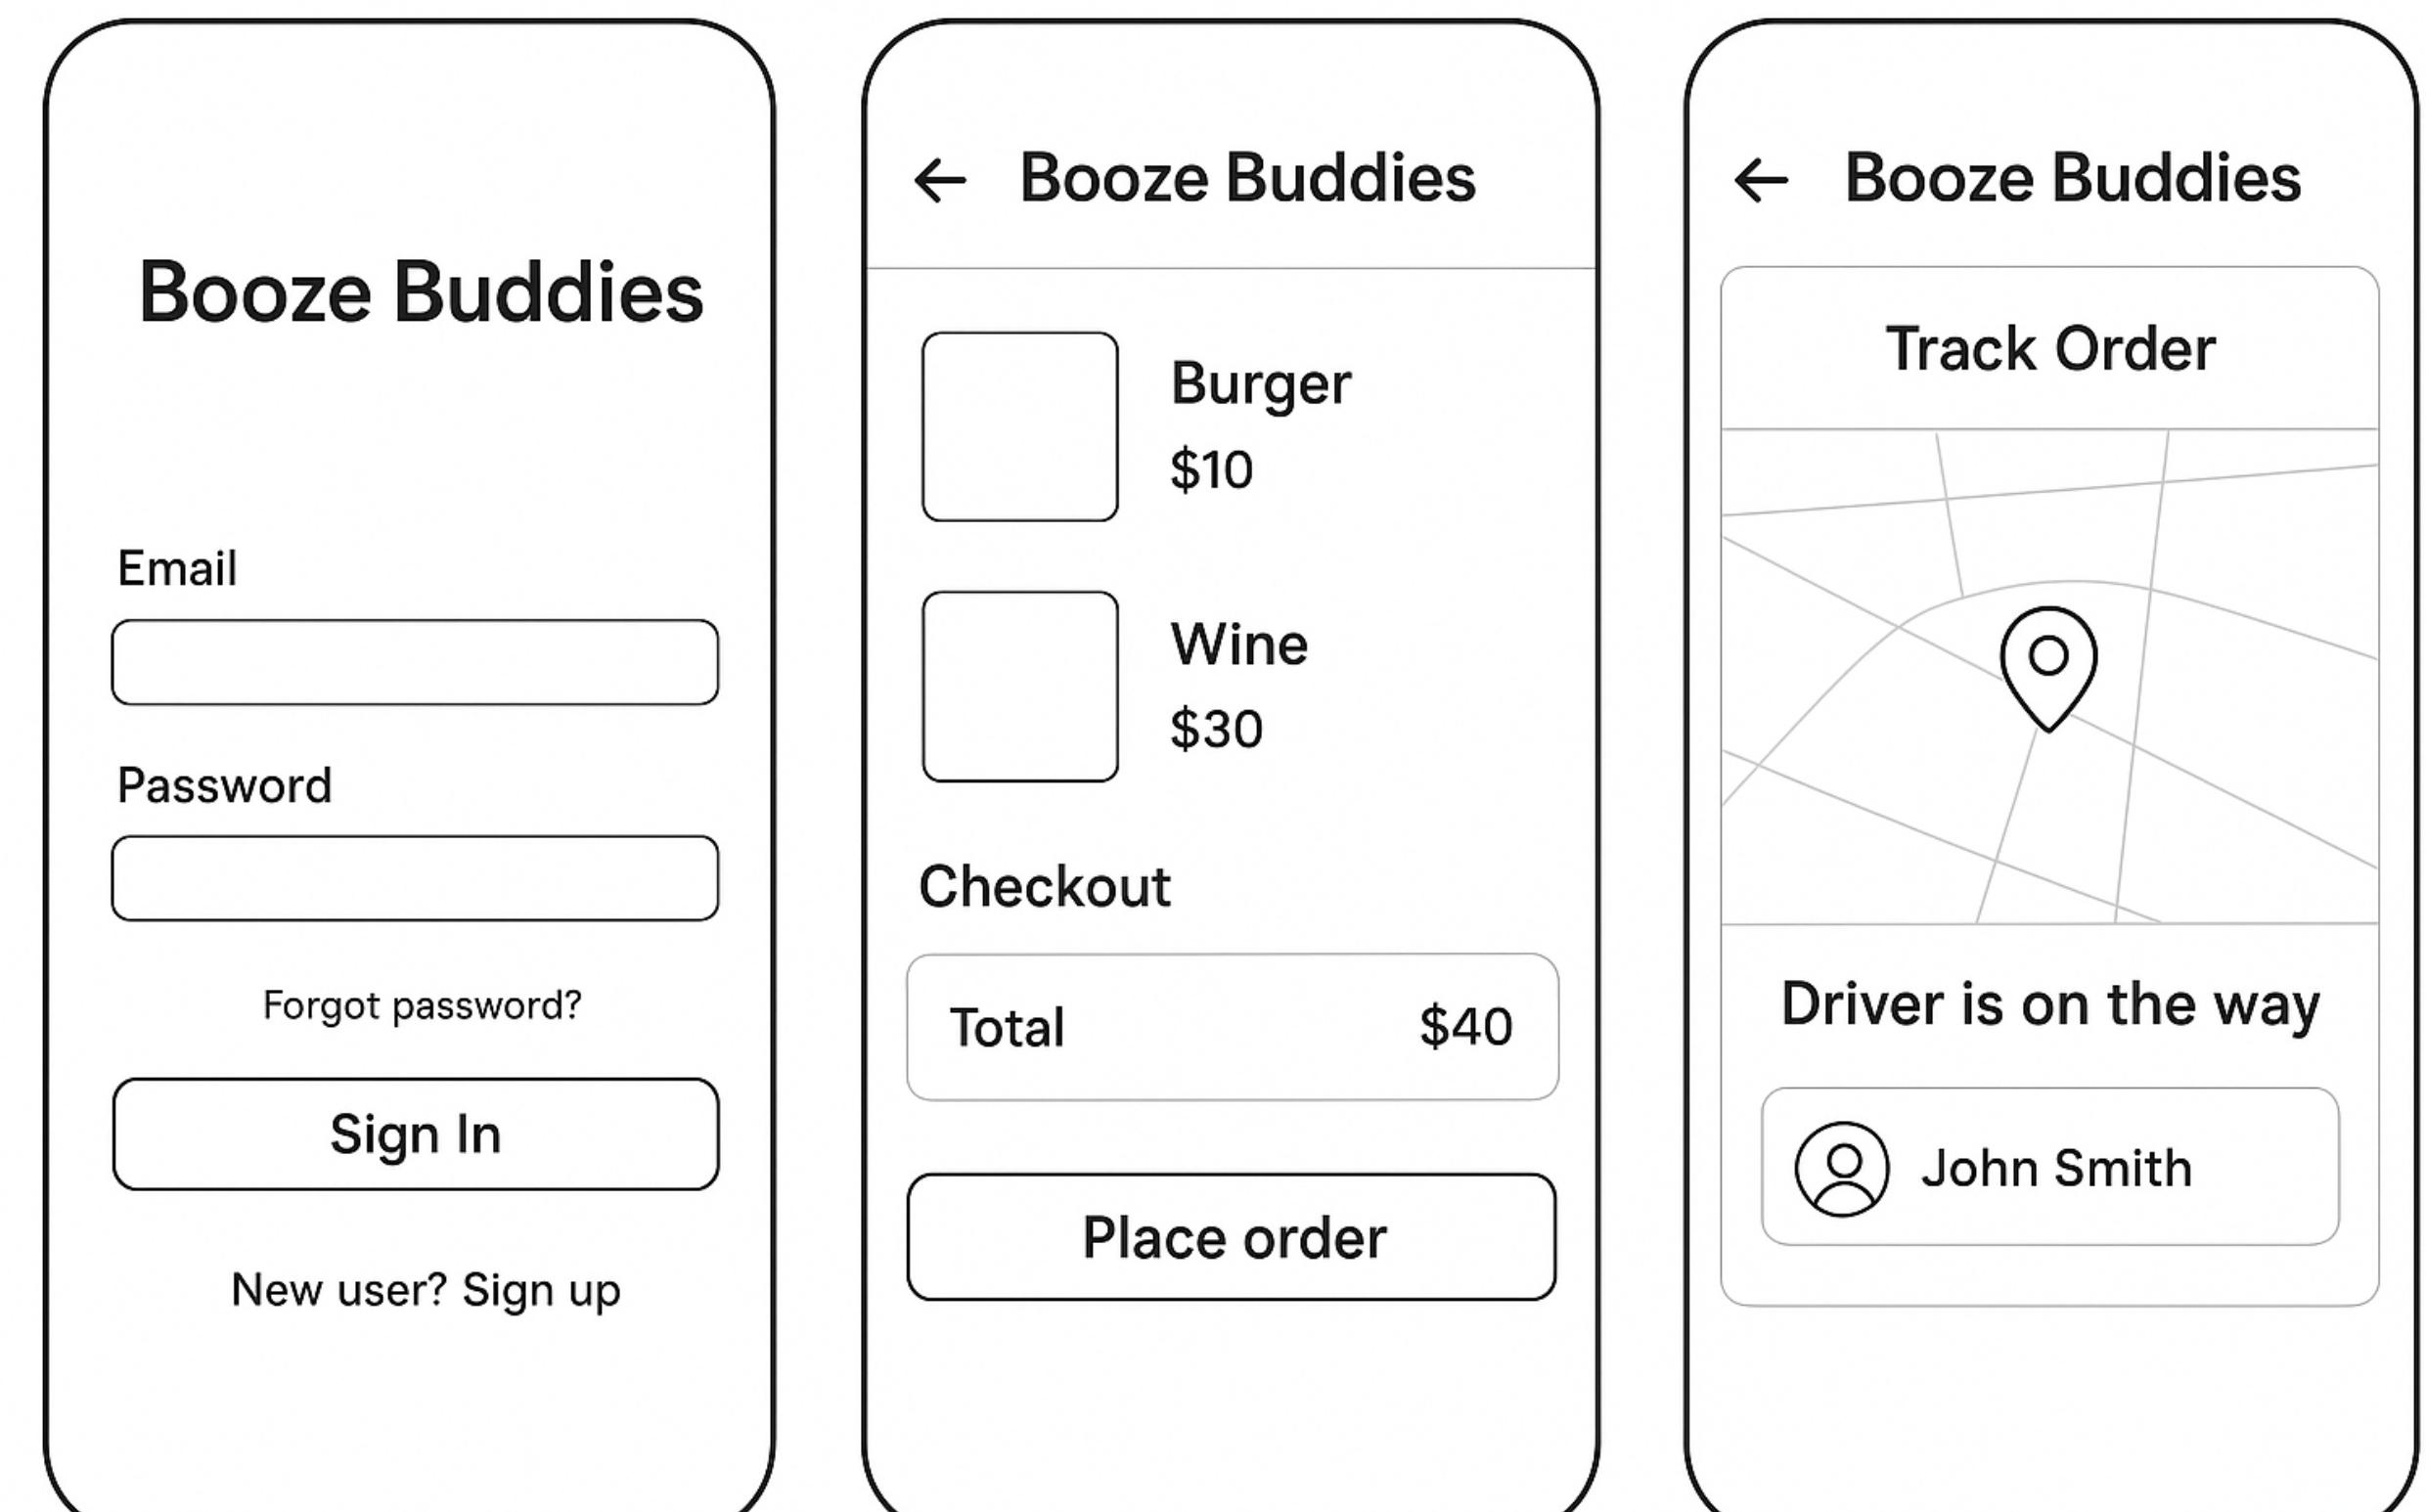

- Booze Buddies is an all-in-one delivery platform that seamlessly connects customers to both their favorite restaurants and local liquor stores.
- With a simple, intuitive interface, users can order meals and pair them with beer, wine, or spirits in the same checkout flow, making it easy to plan everything from casual dinners to special celebrations.
- The platform manages age verification for alcohol purchases, tracks orders in real time, and ensures secure, timely delivery through a network of vetted drivers.
- By combining food and alcohol delivery into one streamlined service, the software provides unmatched convenience and creates new revenue opportunities for merchants while enhancing the customer experience.

Stakeholders

- Customers
- Retailers / Liquor Stores
- Delivery Personnel / Logistics Providers
- System Administrators / Developers

Booze Buddies Wireframe

Potential Tech Stack

Frontend	Backend (Python)	Database & Storage	Integrations
React.js (Web)	FastAPI (preferred for performance)	Stripe / PayPal (payments)	Docker + GitHub Actions (CI/CD)
React Native (Mobile)	django rest or Django REST WebSockets	Persona verifyf (age verification)	AWS / GCP Deployment
tailwind	JWT	Google Maps API	GitHub Actions (CI/CD)
Google Maps	WebSockets (order tracking)	Redis / MONB (real-time cache)	AWS / GCP Deployment
		Redis / MongDB (real-time cache)	Actions (CI/CD)
PostgreSQL (main DB)
